# WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No.
PCT/US04/21586

Box No. I Basis of this opinion					
1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.					
This opinion has been established on the basis of a translation from the original language into the following language, which is the language of a translation furnished for the purposes of international search (under Rules 12.3 and 23.1(b)).					
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:					
a. type of material					
a sequence listing					
table(s) related to the sequence listing					
b. format of material					
in written format					
in computer readable form					
c. time of filing/furnishing					
contained in international application as filed.					
filed together with the international application in computer readable form.					
furnished subsequently to this Authority for the purposes of search.					
In addition, in the case that more than one version or copy of a sequence listing and/or table relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

## WRITTEN OPINION OF THE INTERNATIONAL SEARCHING AUTHORITY

International application No. PCT/US04/21586

Box No. V Reasoned statement under Rule 43 bis.1(a)(i) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

#### 1. Statement

Novelty (N)	Claims	1-32 and 38	YESYES
2101029 (47)	Claims	33-37 and 39-40	NO
Inventive step (IS)	Claims	1-32 and 38	YES
	Claims 5	33-37 and 39-40	NO
Industrial applicability (IA)	Claims	1-40	YES
•	Claims	NONE	NO

#### 2. Citations and explanations:

Claims 33-37 lack novelty under PCT Article 33(2) as being anticipated by Violante (US Patent 3,840,017). The Violante patent discloses a syringe having a chamber and a suture positioned in the chamber. The spool 152 whereat the suture is coiled and it is considered a stop to prevent the suture from exiting the chamber.

Claims 39-40 lack an inventive step under PCT Article 33(3) as being obvious over Violante in view of Chan (US Patent 5,562,683). The patent to Chan suggests a hollow needle having a helical distal end in figure 47. It would have been within the purview of one having ordinary skill in the art to provide Violante with a helical tube for easier insertion into the tissue.

Claims 1-32 and 38 meet the criteria set out in PCT Article 33(2)-(3), because the prior art does not teach or fairly suggest a hydrodynamic suturing needle having a syringe type suction chamber having a length of suture and fluid; further including a hollow suturing needle having a proximal end connected to said chamber.

The prior art further fail to teach or suggest the above device in combination with forceps type instrument having an elongate tubular shaft and jaws at the distal movable between an open and close position.

Claims 1-40 meet the criteria set out in PCT Article 33(4), and thus have industrial applicability because the subject matter claimed can be made or used in industry.
